

School Services

Estates and Health & Safety

The importance of keeping our pupils and staff safe is ever increasing, as is the legislation for properly doing so. We can support leaders with various aspects of premises and contracts management, not limited to:

- Advice on the management of school health and safety and managing risk
- Advice and support on the development of capital building projects
- A framework of support services for schools to effectively manage their sites.

Get in touch with our trained experts for tailored support.
